Chennai: In an attempt to ensure greater collaboration between students and the industry, the Rajalakshmi Group of institution signed two MoUs on Wednesday, both focusing on the field of biomedical engineering.

The first was signed with Faber Sindoori Management Services, a company aligned with the Apollo hospitals.

Speaking at the event, Haree Shankar Meghanathan of Rajalakshmi Institutions said such collaborations would cater to the biomedical engineering students, helping them to get a ground exposure on the industry. "A company like Faber Sindoori has acquired some valuable expertise on maintenance of biomedical equipment, quality control and housekeeping services. To get an exposure to such quality practices, student would usually have to work at hospitals. But with this MoU, students can get the same while they are a part of their college," he said.

The MoU will concentrate

on faculty training, R&D projects between the college and Faber Sindoori and collaborative projects in other

medical equipment from sensors to ventilators and also calibration of medical equipments.

With the signing of the MoUs, students can get exposure to quality practices while they are still part of the college
